TWEET GENERATOR

How can we get a computer to say something tweet-worthy?

RON PAUL SAID WHAT?

This secrecy is fundamentally wrong with whatever industry or activity they are thinking only of political parties compete for power.

What are your thoughts on abolishing America's income tax altogether and get others to look into our private communications?

New government programs and spiderwebs of red tape really solve anything.

ITERATIVE STEPS

Randomly generate words from a dictionary

Make Flask web app and deploy to Heroku

Sample words from a Markov grammar model

Collect a corpus and analyze word frequency

Connect to Twitter API to tweet sentences

PROJECT GOALS

Python scripting and web app development

Text processing of natural (human) language

Probability and Markov models

Data structures and performance analysis

Regular expressions

WHAT TO FOCUS ON

Python programming proficiency

Familiarity with tools, modules and libraries

Understand tradeoffs for data structures

Write clean code – make it maintainable

Level up your level of understanding
